

According to the ranking '100 Economic Leaders For The Future'
prepared by the Choiseul Institute

Alberto G. Toribio, responsible for Blockchain at Bankia, among the '100 Economic Leaders of Tomorrow' in Spain

- The study is focused on identifying the Spanish leaders of the future and its third edition has been published in our country
- Alberto G. Toribio, who enters for the first time in position 56 of the ranking, signed for Bankia in 2017 to lead projects based on Blockchain technology
- As an expert in technology, Toribio has also collaborated with national organisations; such as the Ministry of the Interior, the Supreme Court or the Bank of Spain; and international ones, including the Federal Reserve of the United States, the European Commission or Europol

Madrid, 31/01/2019. Alberto G. Toribio, responsible for Blockchain at Bankia, has been included among the '100 economic leaders tomorrow' in Spain in the ranking that the Choiseul Institute publishes each year.

This is the third edition of '100 Economic Leaders For The Future' and Alberto G. Toribio enters for the first time in position 56 of the ranking.

The study is focused on identifying the Spanish leaders of the future. To carry out the selection, the Choiseul Institute has developed a methodology of its own, previously tested in other similar works in France and Africa, in order to carry out an in-depth analysis of the candidates.

This analysis has been based on aspects such as aptitudes and professional career, power and position, influence and relationships, image and reputation or potential and leadership. Given the particular circumstances of Spain and its educational system, people in the range of 30 to 42 years have been included.

Bankia

After creating the first Blockchain startup in the world with a banking partner and creating Blockchain projects for large companies, Alberto G. Toribio joined Bankia in 2017 to lead projects based on Blockchain technology.

He has also worked as a technology expert for organisations such as the Ministry of the Interior, the Supreme Court or the Bank of Spain. His experience led him to collaborate with international organisations such as the Federal Reserve of the United States, the European Commission, in Brussels or Europol, in The Hague.

The Choseul Institute is an independent Think Tank dedicated to the analysis of international strategic issues, as well as global economic governance. Its objective is to create independent spaces for dialogue at the intersection of political and institutional worlds, between the economic environment and in the sphere of ideas, in order to fertilise the debate on contemporary issues, as indicated in the aforementioned study.
